

Better retros.

Less faff.

Most retrospectives die the same handful of deaths: the complaint circle, the silent room, the same tired Mad/Sad/Glad every single sprint. This is the field guide that fixes them.

Flip it open five minutes before your meeting and steal a ready-to-run format, an icebreaker that won't make anyone cringe, or a facilitation move for the room you're actually walking into.

When you're ready, put AI to work on the paperwork - prepping themes, clustering notes, drafting the follow-up - so you can focus on the conversation:

AI handles the paperwork.

Humans handle the talking.

- 30+ retro formats, recipe-card style
- 29 icebreakers you can run cold
- The facilitation craft nobody teaches you
- An AI co-pilot for prep and follow-through

*Prabhjit Mutti builds practical tools for agile teams,
including the themed-retro generator at
